ONBOARDING A NEW SITE

From first call to a running programme — five steps.

01

Site survey with written report

A technician walks the site with you: entry points, storage, waste handling, neighbouring units. Findings in writing — free of charge, no obligation.

02

Monitoring plan and framework contract

Plan per site with floor map and numbered control points; fixed net price per visit; one framework contract for all your sites. Response times are agreed in the contract.

03

Scheduled visits with digital records

Every visit is documented per control point — finding, action, trend — per site and consolidated for head office. Compatible with HACCP, IFS and BRCGS audits.

04

Poison-free digital trap monitoring

Radio-linked traps report a catch immediately, around the clock. The trap never sleeps; the technician does — response times are the ones in your contract, not implied by the sensor.

05

Response when something happens

Discreet treatment outside opening hours — gel and bait methods, no fogging over food surfaces. Also on Sundays and public holidays, with no surcharge.
